

## Quality Management (SOP, GxP...) on Documentum / Alfresco / Oracle WebCenter

### DIA EDM Reference Model

Document and metadata set – starting from the reference model

### Template-based Approach

Create documents from templates – all fully configurable

### Portal / Cloud

Simple and secure access for read only  
Cloud-enabled for both internal and external users

### LMS and other Integrations

Integrate with multiple LMS systems within the CARA UI and  
push documents to submissions or eTMF

# CARA for Quality

CARA for SOP / GxP / Quality Management is a configuration package of the standard CARA product to provide functionality required for managing all kinds of Quality Management (including SOP) documentation. This package covers all the standard document creation, review, approval, signature and publishing functionality required, as well as training (e.g. To Be Read and Understood), reporting and full workflow / lifecycle and Change Request Management, together with Controlled Printing and QR code document viewing. Available with this package is also the CARA Portal with dedicated search and viewing for consumers.

## CARA Quality features

- **Document numbering** (based on any combination of properties)
- Viewing **Effective** versions even when more recent Draft versions exists
- **Dynamic Security** based on any combination of properties
- **Workflows** for Review, Approval, Periodic Review, Making Obsolete etc
- Mechanism for **Superseding** previous Effective versions
- **Periodic Review** workflows and notifications
- Automatically make documents Effective on a particular date (e.g. **Planned Effective Date**)
- Viewing documents by scanning a **QR code** (e.g. on iPad in a lab)
- **Change Request** mechanism
- **Watermarking** depending on status or any other attributes - including different overlays for viewing, printing, exporting and controlled printing
- Capturing **eSignature** on user actions and adding eSignature pages
- **Controlled printing** including print numbers, reason for printing, print addressee

## General CARA features

### DIMENSIONS

CARA has a unique ability to allow users to build their own navigation tree view (“Dimensions”) based on metadata.

### WIDGETS

Extensible panel showing widgets – choose from core set (e.g. properties, renditions) or create your own, linking in any web service / JSP or query as a widget. Rearrange the widgets pane with drag & drop.

### VIEW MANAGEMENT

Define different views for different user groups / usage scenarios. Specify different properties, widgets, filters, SnapLists, Dimensions and other options, allowing users to work in the way that best supports their individual processes.

### DASHBOARDS

Dashboards provide a strong reporting capability for data both inside CARA and accessible externally via web services, and results can be shown as tables, charts or graphs, exported to Excel.

### USER PREFERENCES

All settings that users choose to personalize are saved as their preferences, so that the user can login from another machine and will have the same preferences applied.

### CONFIGURABILITY

CARA has a full configuration and customization layer built in to allow faster deployment and easier validation.
